Once you put it on, it reshapes your body by redistributing flaccid tissues and lifting the buttocks. The panty structure also corrects your posture and reduces the impact of abrupt movements that might hurt your back.

Reshaping Panty Benefits

All the following benefits are supported and explained by Dr. Leonel Kelly, Orthopedic Surgeon.

IMPROVES BUTTOCKS SIZE AND SHAPE.

It positions buttocks backwards and slightly upwards, improving their size and round shape so as to produce a perfect outline.

HELPS THE LYMPHATIC SYSTEM.

It functions as a filter for retaining bacteria, fat and other waste.

LIFTS SAGGING BUTTOCKS.

The gluteus maximus is correctly positioned so that it can effectively perform its own functions.

FAVORS A CORRECT POSTURE PREVENTING TIREDNESS.

Since it supports the waist, it prevents people from walking wrongly or bending forward. By maintaining a correct posture, it reduces tiredness when walking or standing for a long time.

Ardyss Panty is the perfect complement for persons wishing to reshape the body.

06. Buttock anatomy

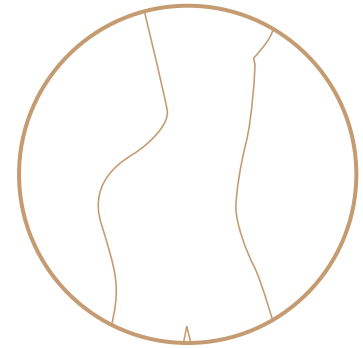

The buttock is mainly formed by the gluteus maximus muscle. This muscle is essential for the beauty of the whole buttock since it defines its round shape as well as its backward and slightly upward position. It is supported by tendons that cross the adipose tissue, which is quite abundant in this area, and are fixed to the muscle surface. It is the tension of these tendons what maintains buttocks in their correct position and functioning properly.

One of the main functions of buttocks is to absorb the impact transmitted from the heels when walking, running or jumping. Specifically, they prevent the transmission of such force to the spinal column.

The reshaping panty lifts buttocks and shapes the body while correcting posture when we walk or stretch in order to prevent injuries.
